

AI-DLC is a practical, comprehensive, and future-ready methodology for building intelligent software in the age of AI. It combines the best of engineering principles with the power of artificial intelligence to help teams design, build, test, deploy, and operate software systems with unprecedented speed, quality, and confidence.

WHAT YOU WILL LEARN

- ✓ Build AI-native software systems from the ground up
- ✓ Use AI across the entire software engineering lifecycle
- ✓ Architect intelligent, scalable, and resilient systems
- ✓ Accelerate development with AI-assisted engineering
- ✓ Implement quality, security, and governance with AI
- ✓ Deploy, operate, and optimize with intelligent automation
- ✓ Evolve continuously in a world of rapid change

WHO THIS BOOK IS FOR

- Software Engineers & Developers
- Engineering Managers & Tech Leaders
- Solution Architects
- AI/ML Practitioners
- DevOps & SRE Professionals
- Anyone building the future with AI

KOLLURU PAWAN

Pawan is a technology leader, architect, and engineer passionate about AI, software engineering, and building scalable, intelligent systems. Through AI-DLC, he shares a practical and visionary approach to help engineers and organizations thrive in the AI era.
